$$\underline{1 - 14 + 11 + 2 = 6 - 10 + 3 + 1}$$

A diagram showing a balance scale. A horizontal line represents the beam, with an equals sign (=) in the center. Below the beam, a triangle is drawn, representing the fulcrum, with the number 0 inside it. The equation $1 - 14 + 11 + 2 = 6 - 10 + 3 + 1$ is written above the beam, with a horizontal line underlining the entire equation.
